

AMR BUGS

Register

- on register, no validation msg appears ,even if user enters valid/invalid data

Email field cashed

- email field keeps cashed data , on clicking backward it will display every written email until backing to the previous page

Responsiveness

- On minimize window , no scroll bar are found for navbar tabs
- Cookies / notification msg is not displayed correctly in mobile mode
- there should be a padding between cookie msg and home page
- spaces between instruction texts in web and mobile mode
- imgs in home page are not responsive (pixeled)

DDL search field \ Enhancement

- DDL is still opened even if user click on any space in the page
- Clear button should be found in the search bar

Recaptcha

- recaptcha validation msg , remains visible even after being checked and completing all the requirements in the form.

Localization

- Some of the members still have their names in arabic while system's language is english

Unclear Text

- Some Important texts in the home page are not clear
